

# MISSION STATEMENT

Our mission is to be a beacon of light to the underprivileged community in the areas of finance and entrepreneurship. With singleness of mind we are determined to create producers in the under-served community not consumers.

# DONATION LEVELS

Whether they are learning financial literacy or economic development, we make sure that the program receives what they need to become better stewards over what they have.

The Whole Lemon  
\$9,000 OR MORE

Half A Lemon  
\$5,000 - \$8,999

A Slice of Lemon  
\$2,000 - \$4,999

Lemon Wedge  
\$500 - \$1,999

Lemon Seeds  
\$1 - \$499

No matter how great or small your gift it will be appreciated and used to help the under-served community.

# EDUCATING OUR YOUTH NOW FOR TOMORROW.

## We Are the Bootstraps!

## ABOUT US

The **Lemonade Stand Bootcamp** is a non-profit 501(c) 3 organization that is dedicated to helping disadvantaged youth become financially literate.

Our primary objective is to foster financial literacy and business acumen among the youth, thus catalyzing community growth. United by a shared vision, we aim to revitalize urban landscapes through education, encouragement, and the cultivation of financial independence and entrepreneurship.

## HOW WE ACCOMPLISH THIS

This year, our initiatives include summer programs, in school and after school programs that are tailored to urban youth, where we have revamped our teaching approach to ensure engagement and prevent boredom. Furthermore, we prioritize the involvement of urban minority professionals who serve as relatable role models, inspiring the next generation toward success.

We have implemented several programs that will address **several areas where the community is suffering**. Because we have created several programs that can help the community and allow it to flourish. We deal with the issues that create poverty and divides the community as a whole.

## WHY NOW!

In 2020 when COVID-19 first started there were a series of events that took place after that shocked and shook the world. After the initial reaction, many scrambled to make sense of it, others ignored it, and then there was us. Looking at the conditions of the underprivileged, we decided to change the views of how the disadvantaged are depicted. So, a group of black professionals came together and discussed how to make an impact quietly.

We need something that once it hit, would sever the carotid artery of America's injustice towards urban community. Rather than march or make a lot of noise, we sat down and came up with a plan.

We decided that if we stopped talking and started teaching it would change the mindset of America's views on the underprivileged community.

After much planning we found the perfect tools to do just that and we will make the change from within the community itself.

## OUR PROGRAMS

Our programs focus on teaching youth several important life skills that have been lost since the 1960's. We aim to restore them back within the community. We have created games and booklets that makes learning fun and easy to comprehend. Our programs are:

1. (T. A. P. Program) Triumphant Advancement in Prosperity
2. (CARTS Program) Community Advancement Resource Training Services
3. Know Thyself Program
4. The LEADership Program (Leveraging Essential Alliances Developing Empowerment Richly)
5. The Financial & Business Summer BootCamp
6. Mo Money Musical

Although each program is designed as a stand-alone program, they work in conjunction with each other to promote and encourage the development of each program.

## HOW TO HELP

We need financial support to help us plant our lemon seeds nationally in the United States. If we can get our program in the under-served communities around the United States we will make a mass impact on the community as a whole. Your financial support will do just that.

We are looking for minority professionals, parents that want better for our kids, and people that just want to help to step forward and sign up as a volunteer.

We are looking for other organization to partner with us and help underprivileged youth see that there are viable role models that want to see them succeed.

We already have curriculum in place. We just need your help to get involved and help keep the youth engaged and learning.
